Name: Siddhant Shinde   date: 13/10/2021

Technical Round 1:

1. Asked me about what is polymorphism and told me to write a code on it in notepad and then told me to compile and run that code (I wasn't able to do that so I asked if I could run the code on eclipse.)
2. Given a string, asked me to find which character has minimum occurrence in that string (coding in eclipse). [Remember here we should know the logic of the program more].
3. What is difference between array and hashmap? Which should be used when.

Technical Round 2:

1. Briefly introduce yourself and also go through your project.
2. What was your role in the project? [Based on your role questions will be asked.]
3. Why did you choose react? Do you know any alternative to react? Which all frameworks do u know?
4. What did u use in middleware and why?
5. Can u explain ur project works in terms of a diagram? [I didn't draw the diagram but I explained the interviewer properly what the flow of the project was.]

HR Interview:

1. Briefly introduce yourself and then asked about family background.
2. "Are u ready to travel daily because u stay a bit far from the company location?"

3. What do u know abt NSE? [this is very big plus point if u are able to answer]
